

Remote Lesson 01 - Vue Cli and Vue Component Files

OUTCOMES

1. Understand how to install, use (create a project) and troubleshoot on the Vue cli
2. Use some components in combination with the Vue cli
3. Recognize the subtle differences in coding patterns used for different tasks on the vue cli

TIME

- 2 - 3 hours

MATERIALS

- Code Editor
- Web Browser - Chrome
- Pen and paper for notes and to do's

ACTIVITIES

1. Install the vue cli on your own computer
2. Create and register a component and incorporate into the vue cli workflow
3. Create a second child component within a component
4. Add an external stylesheet to the vue project

STUDENT INTERACTIONS

1. Online meeting
2. Chats online and planning reviews

QUESTIONS & REFLECTION & CONTINUOUS LEARNING

1. What are your impressions of the vue cli? Do you find it useful? Why or why not?
2. Did you notice any differences in coding patterns when using and incorporating modules, what were they?
3. Why bother using the vue cli? Why not just make your own workflow with Webpack or Gulp?

*** **Extra:** *Try incorporating an older project into the vue cli, create a branch for the task.*
